

ADR[®] 4 Automatic Defect Removal System

In 1983, [Key Technology](#) revolutionized the french-fry industry with the first-generation ADR[®]1 automatic defect removal system – and ADRs now process over 95 percent of the world's frozen french fries. Key's new [ADR[®]4](#) improves cutting accuracy and good-product recovery, simplifies maintenance, and provides exceptional defect detection, with significant advances for peel-on product.

Benefits

- Enhanced defect detection for peel-on products
- Flexibility for varied product specifications
- Better recovery of good product
- Higher capacity
- Optimal performance for a variety of products
- Quick, easy changeover from one product to another
- Economical – simple, fast sanitation and maintenance

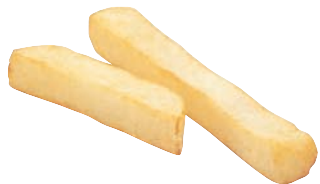

Image Sensor

- Detects both visible and infrared light – identifies peel, good flesh, and defects, all at the same time
 - For peel-on product, recognizes peel as good product
 - For peeled product, recognizes peel as defect

Illumination

- All solid-state – stable and reliable
 - No calibration
 - No bulbs
 - Inspection not compromised by aging emitters

“Smart” Cutting

- Selectively cuts for length, and at the same time removes defects, at lower capacities
 - Ignore internal minor defects if cutting would create shorts
 - Halves over-long fries to control size reduction and grade
- Reduces downstream breakage of overlength fries
- Allows for product pre-grading to blend with higher percentages of short cuts

Iso-Flo[®] Alignment Conveyor and Infeed Lining Conveyor

- Alignment and singulation enhance detection and cutting
- Higher capacity with more lanes
- Easy access for sanitation and maintenance

Key Technology

150 Avery Street • Walla Walla, WA 99362 • USA

Phone: 509.529.2161 • Fax: 509.527.1331 • product.info@key.net • www.key.net

Cutterwheel System

- Pneumatically actuated knives improve accuracy and reliability
- Can throw a single knife for smart cutting

Nubbin Remover Option

- Combines Key Iso-Flo and Farmco Rotary Size Graders
 - Higher efficiency
 - Greater recovery
 - Smaller footprint

Solutions That Make Sense

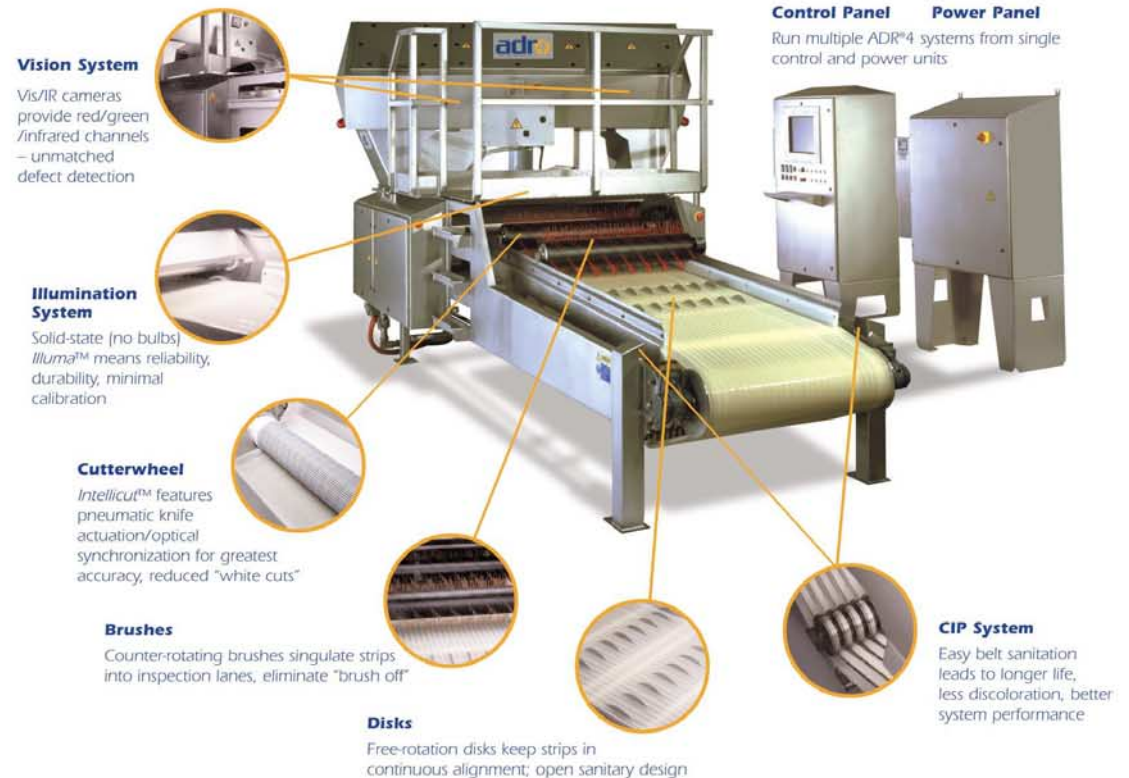

Key knows that, at the end of your day, you measure your investment's value by your bottom-line results. The ADR4 enhances your profitability through increased productivity, more consistent quality, improved yield, and reduced costs. Can you afford not to have ADR4?

The Next Level: Look at the strength you add when you move up to ADR4...

FEATURE	ADR ⁴	ADR ^{III}	ADR ^{II}	ADR ^I
Intellicut™ Cutterwheel Assembly	Yes			
* Length Grading/"Smart Cutting"	Yes			
Pneumatic Knife Actuation	Yes			
Illuma™ Solid State Vis/IR Lighting	Yes	Upgrade	Upgrade	
Tri-chromatic (Vis/IR) Cameras	Yes			
Tegra [®] -like Operating System	Yes			
Iso-Flo [®] Infeed Conveyors/ New Design	Yes			
Six Added Lanes	Yes			
Product Analysis and Reporting (KeyDM)	Option			
Free-Rotation Alignment Disks	Yes			
Counter-Rotating Brushes	Yes			
Belt CIP System	Yes			
Belt-driven Cutterwheel	Yes			
Single control/power panels operate two ADR ⁴ s	Yes			
Opto Sensor Index	Yes			
Cutterwheel CIP System	Yes	Yes	Upgrade	Upgrade
Plastic Spacing Shims	Yes	Yes	Upgrade	Upgrade
Color Touch-Screen Control	Yes	Yes	Upgrade	
Training/ Operation and Maintenance	Yes	Yes	Yes	
VHO Fluorescent Lamps		Yes	Yes	Upgrade
Water-Actuated Knives		Yes	Yes	Yes
Colorsort [®] -like Operating System		Yes	Upgrade	
Bi-chromatic Cameras (Vis/IR)		Option	Upgrade	

Accuracy,
Length-Optimization,
Good Product Recovery
