

# Iso-Drive<sup>®</sup> Energy Unit & Vibratory Electric Motors

Iso-Flo<sup>®</sup>'s frame-mounted Iso-Drive<sup>®</sup> energy unit distributes even, torque-free vibratory forces solely to the conveyor bed without being subject to vibratory forces itself.

Compact, quiet and easy to set up, Iso-Drive<sup>®</sup> operates on a large or small gearbox configuration with a stainless steel cast base.

In addition to Iso-Drive<sup>®</sup> powered equipment, Key manufactures vibratory systems driven by paired electric vibratory motors operating on Iso-Flo<sup>®</sup> principles. These time-proven motors are available in many sizes and configurations.
