

# Pan Configurations

[Iso-Flo®](#) and [Impulse™](#) shaker pans can be configured to fit almost any need, from straight conveying to splitting and maintaining product flow in two or more streams. For instance, use multilane beds with fixed or adjustable dividers with Key's manual diverters and pneumatic slide gates to create a distribution shaker. Or use conveying second decks to receive and convey segregated product for grading and scalping applications.

## Conveying Second Decks

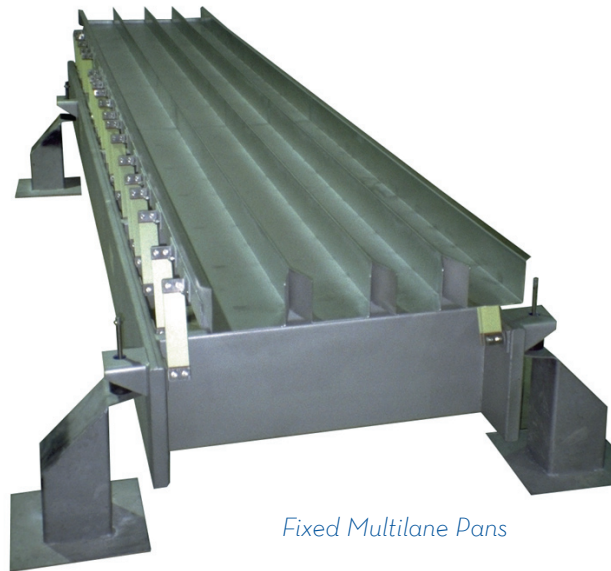

- Collect and convey segregated product from grading/scalping
- Straight- or bias-cut discharge
- Widths up to 1829 mm (72")

*Conveying Second Decks*

## Fixed Multilane pans

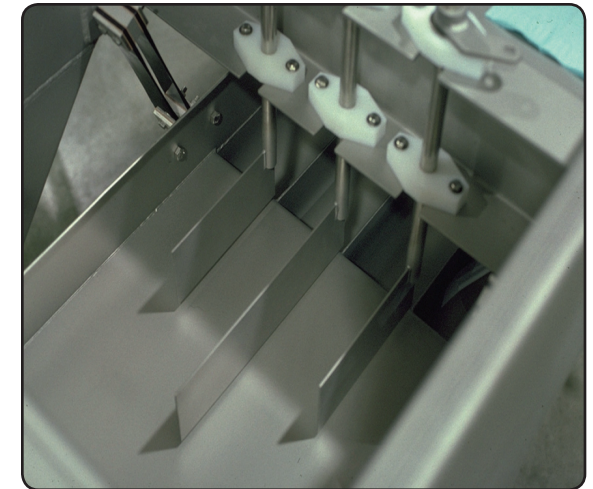

- Divide, channel, and feed product for almost any application
- Pans to 1829 mm (72") wide
- Many lane cross-sections

*Fixed Multilane Pans*

## Adjustable Multilane Gates

- Quick lane shut off
- Manual or pneumatic available
- Non-vibrating for long life

*Adjustable Multilane Gates*
