

Belt Conveyors

Fabric, Mesh and Plastic

Processing and packaging often require [belt conveyors](#) to elevate, decline, or transport product. As part of Key's integrated solutions, we offer belt conveyors specifically designed for your industry, specializing in food and pharmaceutical industrial applications.

Sanitary and robust, Key's belt conveyors are available in many widths, lengths, designs, and materials. They complement Key's Smart Shaker® solutions and world-leading automated inspection products.

Modular Belt Conveyors are manufactured in a wide variety of configurations which share common components and construction. Modular Belt Conveyors may use one of several belt types including Intralox® and KVP®.

Common Product Applications

- Bulk products
- Fresh cut meat and poultry
- Nuts
- Pet food
- Potato products
- Processed fruit and vegetables
- Snacks, cereals

Features and Benefits

- Sanitary design—easy cleaning
- Most constructed with T304 stainless steel components
- Drive components to the side of product flow
- USDA approved belts, cleated and non-cleated
 - Fabric
 - Plastic (polypropylene or polyethylene)
- Standard-profile designs for proper application fulfillment
- Modular designs with pre-manufactured standard components
- Handles steeper incline/decline angles than flat-pan conveyors

Easy to Install

- Floor mounted
- Suspended
- Mounted on casters
- Complement other Key material handling and optical inspection components
- Options—belt scrapers, washers, return slides, rollers

Other applications may be used on this equipment. Call Key to find out about how your product(s) may benefit from this technology or another system.
