

Forté™ Control Systems

A [Forté™ control system](#) from Key Technology is a cost-effective alternative to conventional independent control systems. Because they're designed to work together, Forté™ "amplifies" the performance of your Key [vibratory conveyors](#), [processing systems](#) - even [sorters](#).

Benefits

- **Single source** for equipment and controls - flawless integration!
- **Quick, economical installation**, using pre-designed basic modules
- **Customized** to your plant and process requirements
- **Convenient** on-floor power and control solutions
- **Interface** with external automation systems
- **Easily expandable** as your processing line expands

Customized for Your Plant

- Control logic programmed to optimize both equipment and process
- Full systems integration, based on our extensive product knowledge
- Complete, thorough documentation so your Forté system can be manufactured, maintained, and expanded, repeatably and simply
- For systems from simple to complex:
 - Basic start/stop motor controls
 - Discrete input/output
 - Fully integrated system with touch-screen user interface and custom graphics
 - Device net communications with individual control modules

Key Technology

150 Avery Street • Walla Walla, WA 99362 • USA

Phone: 509.529.2161 • Fax: 509.527.1331 • product.info@key.net • www.key.net

Quality Materials and Components

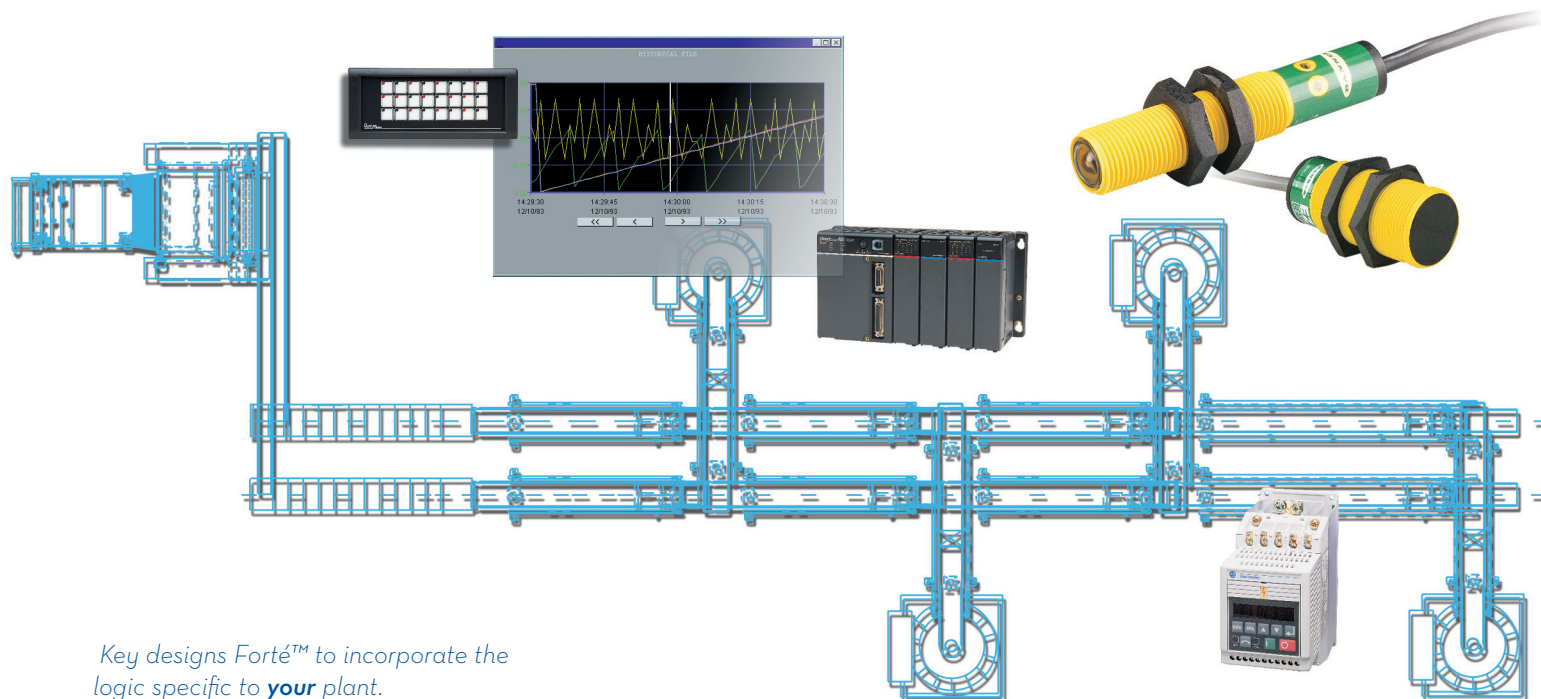

- NEMA 4X rated stainless-steel enclosures
- IEC-compliant system components
- UL listed components
- Completed panels are UL listed and labeled at Key
- Extensive selection of manufacturers' components

Highest Standards for Design and Manufacture

- Key Technology is ISO 9001 certified
- Customized from economical predesigned modules
- System incorporates the number, location, and size of motors, as well as the number of gates, sensors, and other variables that you specify
- Distribution modules are located conveniently close to the equipment they control, reducing wiring and avoiding potential power loss on long wire runs

Simplify Your Life!

Let us be your single source of responsibility for both your Key equipment and its control system – so you can “turn up the volume” on efficient, profitable performance.

Key designs Forté™ to incorporate the logic specific to **your** plant.
